

# PREVENTIVE ORTHODONTICS COURSE:

**"Advanced Learning  
for a Safe Practice"**

# IF YOU:

Are approaching the end of your **academic journey**, you may find yourself concerned about the next step, especially if pursuing a **specialization immediately** is not a viable option. However, acquiring knowledge that is not deeply covered in undergraduate courses serves as the foundation for standing out in the **job market**.

# OR,

Have recently **specialized** in pediatric dentistry and are looking to keep your patients in your practice for a longer period (increasing your **revenue**) before referring them to an orthodontist, in case a second **phase of treatment** (corrective) is needed.

# OR,

Have noticed a **decline** in patient flow at your pediatric dentistry practice? This is the **reality** for many pediatric dentists who **have not trained** to offer preventive treatments in orthodontics.

# OR,

Have **completed your specialization** in orthodontics but still **feel unsure** about clinical practice (two-phase treatment)?

We have an **invitation** for you: a course focused on preventive orthodontics, designed to turn your uncertainty into **confidence** through diagnostic tools and treatments aligned with real, **everyday clinical practice.**

# Know that a **vast market** is **waiting for you!**

Approximately **30%** of patients in orthodontic offices are **children aged 6 to 11**. Get ready to serve this important market niche with confidence, efficiency, and quality.

# Who will be teaching the **course?**

Luiz Torelly, an orthodontist with **35 years of experience**, a master's degree in orthodontics from the Methodist University of **São Paulo**, a **mini-residency at the University of Michigan, USA**, and a national and international **speaker**.

# *How long will the course **last**?*

- **6** meetings in total.
- We will have **18 HOURS** of **IMMERSION** in **PREVENTIVE ORTHODONTICS** that truly works.

- With **6 live online sessions**, each approximately **3 hours long**, scheduled weekly and **taught by me**, where all relevant questions will be welcome.
- All of this will be presented with a **wealth of clinical cases treated in my clinic** and by my former students.
- The **6th meeting** will be led by my dear colleague **@sachet.claudio** on “Approaches in orthognathic surgery for Capellozza’s facial patterns, disc recaptures, and TMJ prostheses.”

# The course program is based on three **fundamental pillars:**

- DIAGNOSIS
- TREATMENT PLANNING
- PROGNOSIS

To achieve this, we will cover **evidence-based methods** and tools such as:

- Analysis of the **5 Facial Patterns** proposed by **Dr. Capellozza** (@dinocapellozza), allowing a detailed understanding of the variations in facial proportions and their reflections in soft tissues and occlusion (dental compensations), as well as the treatment peculiarities of each pattern.
- Analysis of **space in the dental arches**, based on **Thomas Creekmore's** article "Teeth Want to be Straight", which emphasizes the importance of considering the available space (leeway space) for effective dental alignment, particularly in the lower arch.

## *And **MORE:***

- The **3 phases of mixed dentition** proposed by **Van der Linden**.
- **Identification** of the optimal timing for **implementing** the **treatment plan**, using a few types of **appliances** to achieve **quick, predictable results**, while **maximizing** treatment **efficiency**.

# Course Fee: \$160

The number of students is **limited to 12 per class** to ensure greater interaction between instructors and students!

- This course is a **valuable** and **accessible** opportunity for you to safely apply preventive orthodontic treatments in a short period of time.
- Enhance your **skills** in **diagnosis** and two-phase treatment.

Contact us for more information. You'll speak directly with me.

LUIZ TORELLY ORTHODONTICS

I look forward to hearing from you!

LET'S WALK **TOGETHER** ON THIS JOURNEY OF VALUABLE  
**LEARNING**, FOCUSED ON EVERYDAY **CLINICAL PRACTICE** IN THE  
OFFICE.

LUIZ TORELLY ORTHODONTICS

# COURSE PROGRAM

LUIZ TORELLY ORTHODONTICS

**Diagnosis** based on the 5 facial patterns proposed by **@dinocapeloza**, analysis of space in the dental arches, and optimal timing to begin preventive **orthodontic treatment.**

# 02

Characteristics of  
Facial **Patterns I**  
**Clinical Cases**

Characteristics of  
Facial **Patterns II**  
**Clinical Cases**

03

# 04

Characteristics of  
Facial **Patterns III**  
**Clinical Cases**

Characteristics of **Long  
Face and Short Face  
Treatments  
Clinical Cases**

05

# 06

Class with my dear  
colleague  
**@sachet.claudio** on  
“Approaches in  
orthognathic surgery for  
Capellozza’s facial  
patterns, disc recaptures,  
and TMJ prostheses.”

# I'LL BE WAITING FOR YOU!

Let's **walk together** on this journey of valuable learning, focused on the everyday **clinical practice** in the office!
